About Me

I studied a Higher Vocational Degree in Cross-Platform Application Development (DAM) at Retamar. I also have a high school diploma, passed the Cambridge English: First (FCE) exam, and completed a specialized MOA course in Data Analytics. Additionally, I have experience working in the dairy industry.

I possess upper-intermediate to advanced knowledge of programming languages such as C#, JavaScript, PHP, and Java. I recently worked on a medium-term project using various tools and languages including .NET and JavaScript. I also used SQL Server Express to create and manage the project's databases.

In 2019, I attended a three-week military orientation camp with Tercios de Lezo.

I am currently seeking (or looking for) job opportunities in development and/or cybersecurity. I have completed a Higher-Level Cybersecurity Course and am preparing for the Cambridge Advanced Certificate in English (CAE).

Habilidades

- Inglés (B2)
- JavaScript
- HTML
- CSS
- C#
- PHP
- Kotlin, Java y Unity
- Phyton
- PHP
- Hydra
- Hulk
